

PizzaGest Kiosk

PizzaGest Kiosk App Menu

Once the **PizzaGest Kiosk** app is open, press the Windows key to open the bottom taskbar menu. Right-clicking the PizzaGest icon opens the available options.

Selecting **Reconfigure App** opens the kiosk's configuration panel.

In the first field, **Application URL**, enter the store's kiosk URL.

Pizzagest Kiosk - Configuración

Pizzagest Kiosk Configuration

Configure your kiosk application settings

 **Application URL:**

Enter the full URL of your web application (with http:// or https://)

 **Custom Header Logo (optional):**

From file:

or

From URL:

If set, this logo will always be used on printed receipts — overriding any logo from the web application. Store name is always printed alongside the logo.

 **Diagnostic Tool Language:**

Language for the diagnostic tool and templates

 **Primary Language:**

Main language for the application interface

 **Secondary Language:**

Alternative language option (English recommended as fallback)

 **Force Printer Mode:**

Custom receipt logo

The **Custom Header Logo** option lets you set the logo that appears at the top of the printed receipt, either from a local file or a URL.

“ If a logo is configured, the store name will no longer be printed on the receipt.

Once selected, a confirmation message appears along with a preview of the logo.

The screenshot shows a configuration window titled "Custom Header Logo (optional):". It has two main sections: "From file:" and "From URL:". The "From file:" section includes a "Choose image..." button and a text field containing "logo.png". The "From URL:" section includes a text field containing "https://example.com/logo.png". To the right of these fields, there are two radio button options: "Medium" (which is selected) and "Full size". Below these options, there is a confirmation message: "Custom logo active" with a green checkmark icon, followed by the text "This logo overrides any logo sent by the web application". To the right of this message is a "Clear" button. At the bottom of the window, there is a note: "If set, this logo will always be used on printed receipts — overriding any logo from the web application. Store name is always printed alongside the logo."

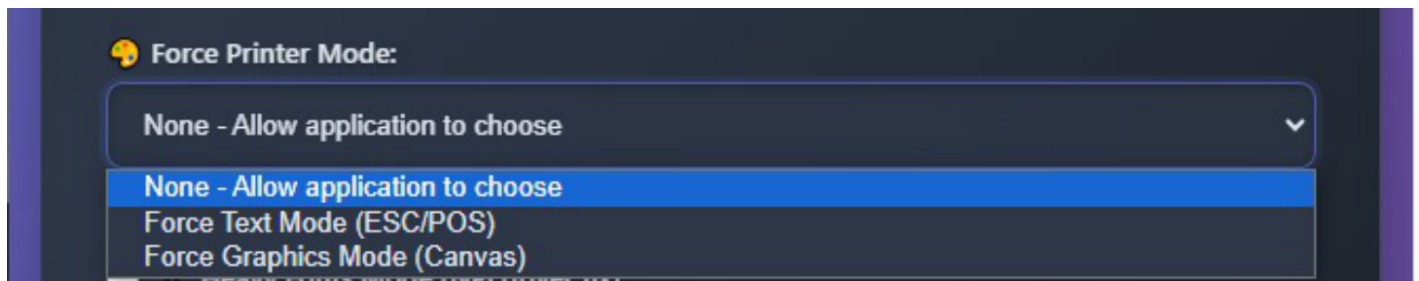

You can increase the logo's size by selecting the **Full Size** option, which is the maximum size available for printing.

To remove the configured logo, click the **Clear** button shown to the right of the confirmation message.

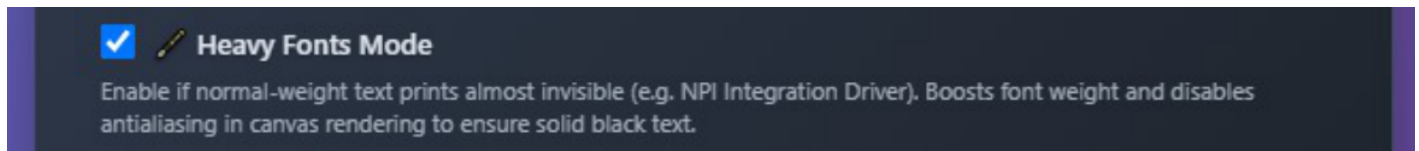

Print mode and font size

The configuration menu also includes the printer mode setting, **Force Printer Mode**.

If you experience issues using your printer's graphics mode, select **Force Text Mode (ESC/POS)** so the printer prints in text mode and produces an error-free receipt.

If the receipt text needs to be more visible, enable the last option in the configuration panel, **Heavy Fonts Mode**.

After making changes, save the configuration. If you don't edit it again, the app will automatically load the last saved settings.
