Cash Movements Breakdown

From this screen you modify the movements of the Cash Count and of the Drivers Checkout.

How to get here: Modify button on the Check Cash Counts screen, the money button on the Initial Float and Cash Count screen, or the **Checkout payment method** button on the Checkout Driver screen.

The screen is divided into two columns: **Cash** and **Payment methods**.

Cash

Here you see all the banknotes and coins that exist. The banknotes and coins are configured on the Currency screen.

- **Plus +** and **Minus -**: increase or decrease the quantity of each coin.
- **Type** column: to enter a fixed quantity, click directly on the image of the coin and type the quantity you want.

Payment methods

Here you see all the available payment methods, such as Cash, Credit Cards or Cheque Gourmet vouchers.

- **Type** column: to add an amount to a payment method, click directly on its image and type the amount you want to add.
- **Delete** column: the red cross sets the amount of the corresponding payment method to 0.

> If you change the amount of the Cash payment method by hand, the number of banknotes and coins you have set in the **Cash** column is deleted.

Buttons

- **Ok**: click it when you have finished modifying the movements of the Cash Count or the Drivers Checkout.
- **Cancel**: closes the screen without saving the changes.
