Choose Employee Data

On this screen you choose the job and the start and end times of the employee you add to the schedule manually.

How to get here: by choosing an employee on the Add Employee screen, opened with the **Add MANUAL** button.

Data you select

The screen shows the different jobs the employee is qualified for, specified on the Employee Jobs screen.

You have to select:

- The **job**.
- The employee's **start time**.
- The employee's **end time**.

What happens depending on the tab

The result depends on the tab from which you opened this option with the **Add MANUAL** button:

Tab	What the program does
THEORETICAL Schedule tab	Tries to assign the schedule to the employee with the selected data. It checks that the needs are not already covered, that the employee does not work more hours than they should, etc.
REAL Schedule tab	Unlike the **THEORETICAL Schedule tab**, it checks nothing here. You can add an employee at whatever time you want, with no restrictions.
