Production Order

A **production order** is a recipe made of other ingredients that has to be prepared, for example a hard-boiled egg. On this screen you create it or change it, and carry out the production.

How to get here: Add or **Modify** button on the Recipe Production screen.

Preparing the production

- Add as many production orders as you want with the Add or Modify button.
- To delete a production order, select it and click **Delete**.
- When you have finished configuring the production orders, click **Carry Out Production**.

> Once the production order is generated, the original ingredient used to generate the recipe is deducted from the stock and the stock of the produced ingredient increases.

Buttons

- **Add** and **Modify**: open the Production Recipe.
- **Delete**: deletes the selected production order.
- **Carry Out Production**: generates the production order and updates the stock.
