Recipe of Inventory Items

On this screen you select the ingredients that are part of the recipe of an inventory item, with their quantity and yield.

How to get here: Add or **Modify** button in the Add/Modify Inventory Items window, if the inventory item has a Recipe.

Adding ingredients to the recipe

1. Select the ingredient that is part of the recipe.
2. Enter the **Quantity** and the **Yield**.
3. Click **Add**.

Repeat the steps for each ingredient of the recipe.

Quantity and yield

- **Quantity**: the quantity of the ingredient, in production units.
- **Yield**: it is used for products that have some waste. It serves to deduct from the stock the quantity plus the waste. For the other ingredients the yield is `100` %.

> **Example.** The rind has to be deducted from a watermelon, so the yield could be `90` %.

Buttons

- **Add**: adds the chosen ingredient to the recipe.
- **Cancel**: closes the screen without making any changes.
